ELITE FOOTBALL CLUB MANAGEMENT SYSTEM

Abstract

Elite Football Club Management System project is about the management of a football league including various clubs. It is very difficult to manage the paper records when it comes to manual maintainence. A proper football club management automated helps the clubs to manage their team players and can view their scheduling details. This project includes team and player registration which is approved or rejected by the admin. And admin can add and assign organizers for each team. Organizer is the one who assign coach and players to their responsible teams. Tournament scheduling is done by admin. After setting the date and time ticket booking is available for customers. Razorpay payment gateway is used for online payment. Players can enroll the training programmes added by the admin. Also player can apply for leave which is managed by admin. For customers they can make ticket booking based on the tournaments.

Proposed System

The automated league management mainly focus on the organizer who can manage the club and players. Additionally this application provides a football academy which provides a platform for those who are interested to become a future footballer. They can apply for training programme courses. The players can register for the training program which is provided by admin. The trainees can provide their absent details. Leave applications from players can be approved or rejected by the admin and can also get feedback from the players.
